

KEREVİTAŞ GIDA SANAYİ VE TİCARET A.Ş.

ENVIRONMENTAL POLICY

At Kerevitaş Gıda San. ve Tic. A.Ş., we comply with the national and international regulations regarding the environment and have the goal to achieve continuous development in terms of management and reduction of environmental impacts of our activities. The ISO 14001 Environmental Management System Standard guides us during our activities.

The following principles constitute the basis of our environmental policy:

- We act in accordance with all environmental laws and responsibilities while conducting our operations; and we develop practices beyond the legal requirements.
- We ensure that our environmental policy is monitored and audited as part of the Environmental Management System, Supply Chain, Quality Control, Food Safety and Environmental Management.
- We encourage all our stakeholders, including employees, suppliers and business partners to commit for a responsible environmental management.
- We receive support and contributions from employees, suppliers, customers, members of the Board of Directors and all our business partners in terms of environmental management and goals.
- We continuously improve our environmental performance by measuring and reporting results, comparing them to our goals.
- We continuously improve our environmental performance by measuring our goals and objectives and reporting the results. We ensure that our environmental policy is monitored and audited within the framework of the Environmental Management System.
- We support the performance of Environmental Management System with technological and digital advancements.
- We take into account the approaches of suppliers towards the environment during supplier approval processes and audits.
- We raise environmental awareness through employee training.
- We combat against the climate change. We work to minimise greenhouse gas emissions and air emissions by using energy efficiently.
- We determine and use the methods that would minimise the utilisation of natural resources.
- We reduce wastes and packaging generated during our activities at the source, we reuse, recycle and dispose in compliance with the regulations unless they can be recycled.
- We effectively manage and continuously work to improve water consumption. We work to minimise waste water and improve the quality of water emissions.
- We protect the biological diversity.
- We take efficiency and sustainability to the core of our supply processes.
- We work to produce environmentally-friendly products that have low impacts on the environment.

The Sustainability Committee meets at least once a year with the participation of its members including the Vice President as well as the environmental management departments and reviews

environmental policy and practices. The Board of Directors is informed about the decisions taken and the process.

We update our performance as part of our environmental policy and disclose it to the public. We collect the opinions of our stakeholders through stakeholder analysis activities we carry out while determining our material issues as part of the Sustainability reporting.
